

JOB DESCRIPTION

Title: FinTech System Integration Engineer

Company: SecurePay Digital

Location: Auckland, NZ

Job Summary:

Seeking an experienced system integration engineer for our FinTech platforms. Responsibilities include integrating core banking modules (Finacle, SAP Treasury), optimizing SQL database performance, implementing secure authentication (MFA, encryption), and deploying automation tools for digital transaction flows.

Requirements:

- 5+ years' experience with enterprise banking/treasury IT systems
- Expertise in SAP, SWIFT, Finacle, SQL Server
- RPA/automation (Power BI, Excel, Python)
- Proven history of enforcing data security (encryption, MFA, compliance)
- Project management of digital transformation
- Experience with BI dashboards, regulatory reporting
- Preferred: Python, Java, Cloud (AWS), DevOps

Preferred: Master's in IT or related field; strong communication and leadership.
